

Participants Needed for Dementia Caregiver Online Survey

Greetings!

We are writing to invite you to participate in our study on motivation to adopt assistive technology to better communicate with your loved one or a client with dementia. This project is conducted by researchers at the Ohio University (IRB #: 21-X-40) and the University of Wisconsin-Milwaukee (IRB #: 22.084).

Anyone who is aged 18 years old and above and currently providing care for loved one with dementia or a client with dementia is welcome to participate.

Our study involves completion of a survey about your background, caregiving experience and motivation to adopt assistive technology. If you have any questions prior to participating, please contact Dr. Chorng Oh at ohc@ohio.edu.

Your participation is completely voluntary and will last approximately 20-30 minutes. You can cease participation at any time. All your personal information will be collected and stored anonymously. If you complete the survey, we will provide you with a \$5 gift card. It may take some time to process the gift card distribution.

Here is a link to the survey:

https://ohio.qualtrics.com/jfe/form/SV_50aOJ53BKngPFu6

This link will direct you to information about the study and what it means to consent to participate. This link is uniquely tied to this survey. Your email address will be collected for your obtaining a gift card.

Thank you for your participation!

Sincerely,

Chorong Oh, Min Sook Park & Yura Lee, PhD.
