

Come and try Mobile (phone) Orienteering

SELOC introduces the launch of the new
GMOA MOBO Permanent Course
at **Burrs Country Park** on
Saturday 19th March @ 11am-3pm

MOBO is a new way to orienteer; today's smartphone is a 3-in-1 device for the tech savvy orienteer - map, compass and punch - all in the one package!

You still need all your orienteering skills to complete the courses, the maps in the app are standard orienteering maps and for navigation you can use the built-in on-screen compass. There are special control points with QR codes and punch information is sent to a server where you can see your results and split times.

In order to be prepared please download the MOBO app from your App store, register a user name (no other info required, just a name which links to your phone) then download the map so you're all ready to go!

Paper maps will also be available at this event.

For more information on MOBO see <http://mobo.osport.ee/>

For those who don't wish to use MOBO we will be running a traditional Saturday Series Orienteering event alongside this launch.
