*of Vermont*

## **Save the Date & Call for Presentations:** **ACEC of VT 8th Annual Environmental Protection Technical Workshop**

ACEC of Vermont will be hosting the **8th Annual Environmental Protection Workshop** which will consist of three to four presentations and a Roundtable discussion on **Thursday November 9, 2023**, at 40 IDX Drive, South Burlington. We are currently accepting potential presentation topics and will be reviewing them with the intention of creating an agenda that provides engaging material that covers a variety of industry issues and innovations, including:

- Unique project case studies
- PFAS/Emerging Contaminants
- 3 Ac Stormwater
- Flood Resiliency

In order to determine which presentations will be selected for the upcoming Workshop, we request that short abstracts (1/2 page) be submitted which summarize the key aspects of the presentation. PDF versions of PowerPoint presentations will also be accepted if they were previously presented at other conferences or workshops. Regardless of the method you choose to share the nature and purpose of your candidate presentation, please provide enough information for the review committee to be able to evaluate amongst a potentially wide range of topics. All presentations are expected to be 50 minutes total.

Abstracts are due by **September 9, 2023** and should be submitted to Craig Jewett at [Jewett@OtterCrk.com](mailto:Jewett@OtterCrk.com). The review committee plans to have presentations selected and notifications sent to all submissions by **September 16, 2023**. Selected candidate presentations shall be submitted to Craig Jewett at [Jewett@OtterCrk.com](mailto:Jewett@OtterCrk.com) by **October 26, 2023**.

Feel free to contact Craig if you have any questions or would like additional information. The specific details regarding the Workshop will be announced as we get closer to the event.

Thanks,

ACEC of Vermont Environmental Protection Committee
